

Hoe om 'n skewe horisonlyn by die see maklik reguit te maak met Photoshop.

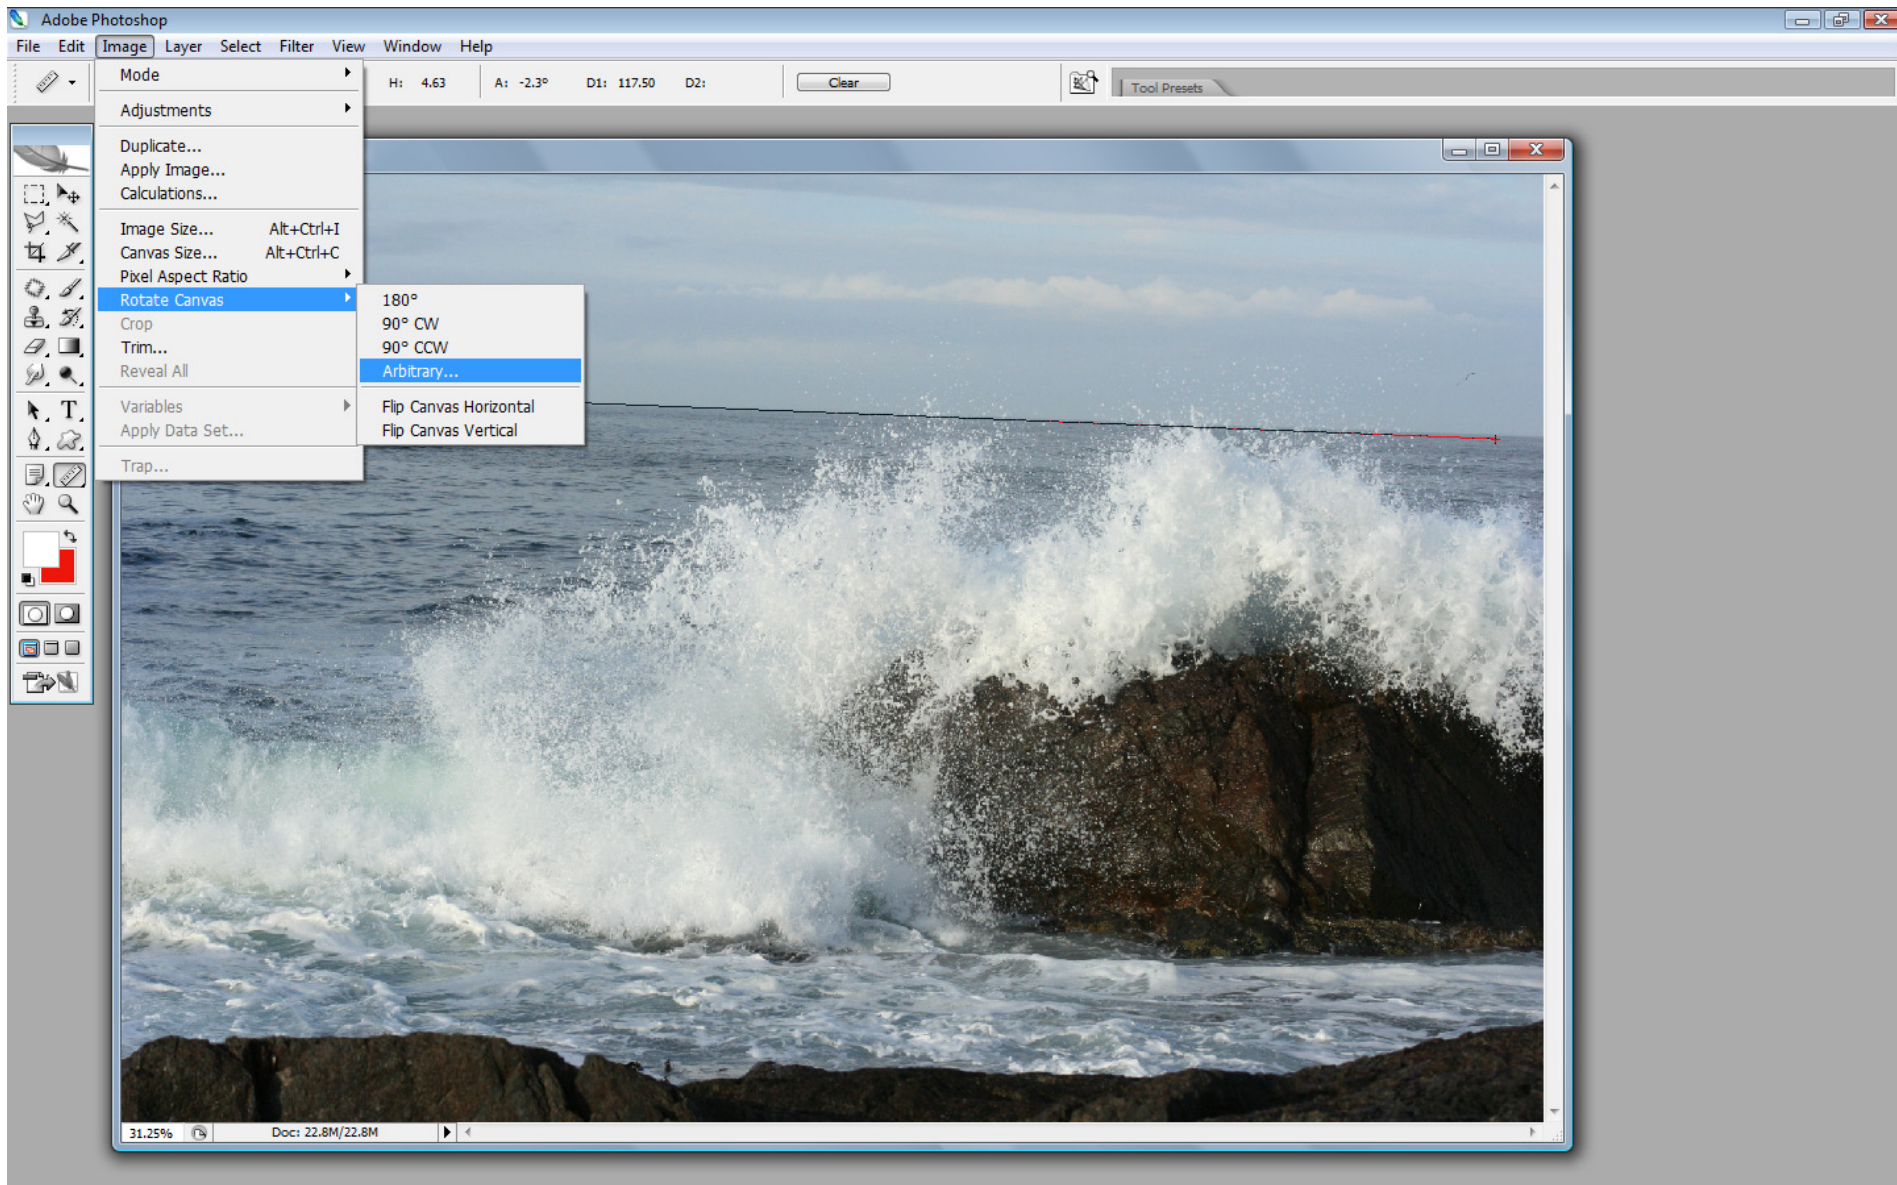

Lekker skewe horison moes vinnig afneem nou loop water uit foto! Wat nou?

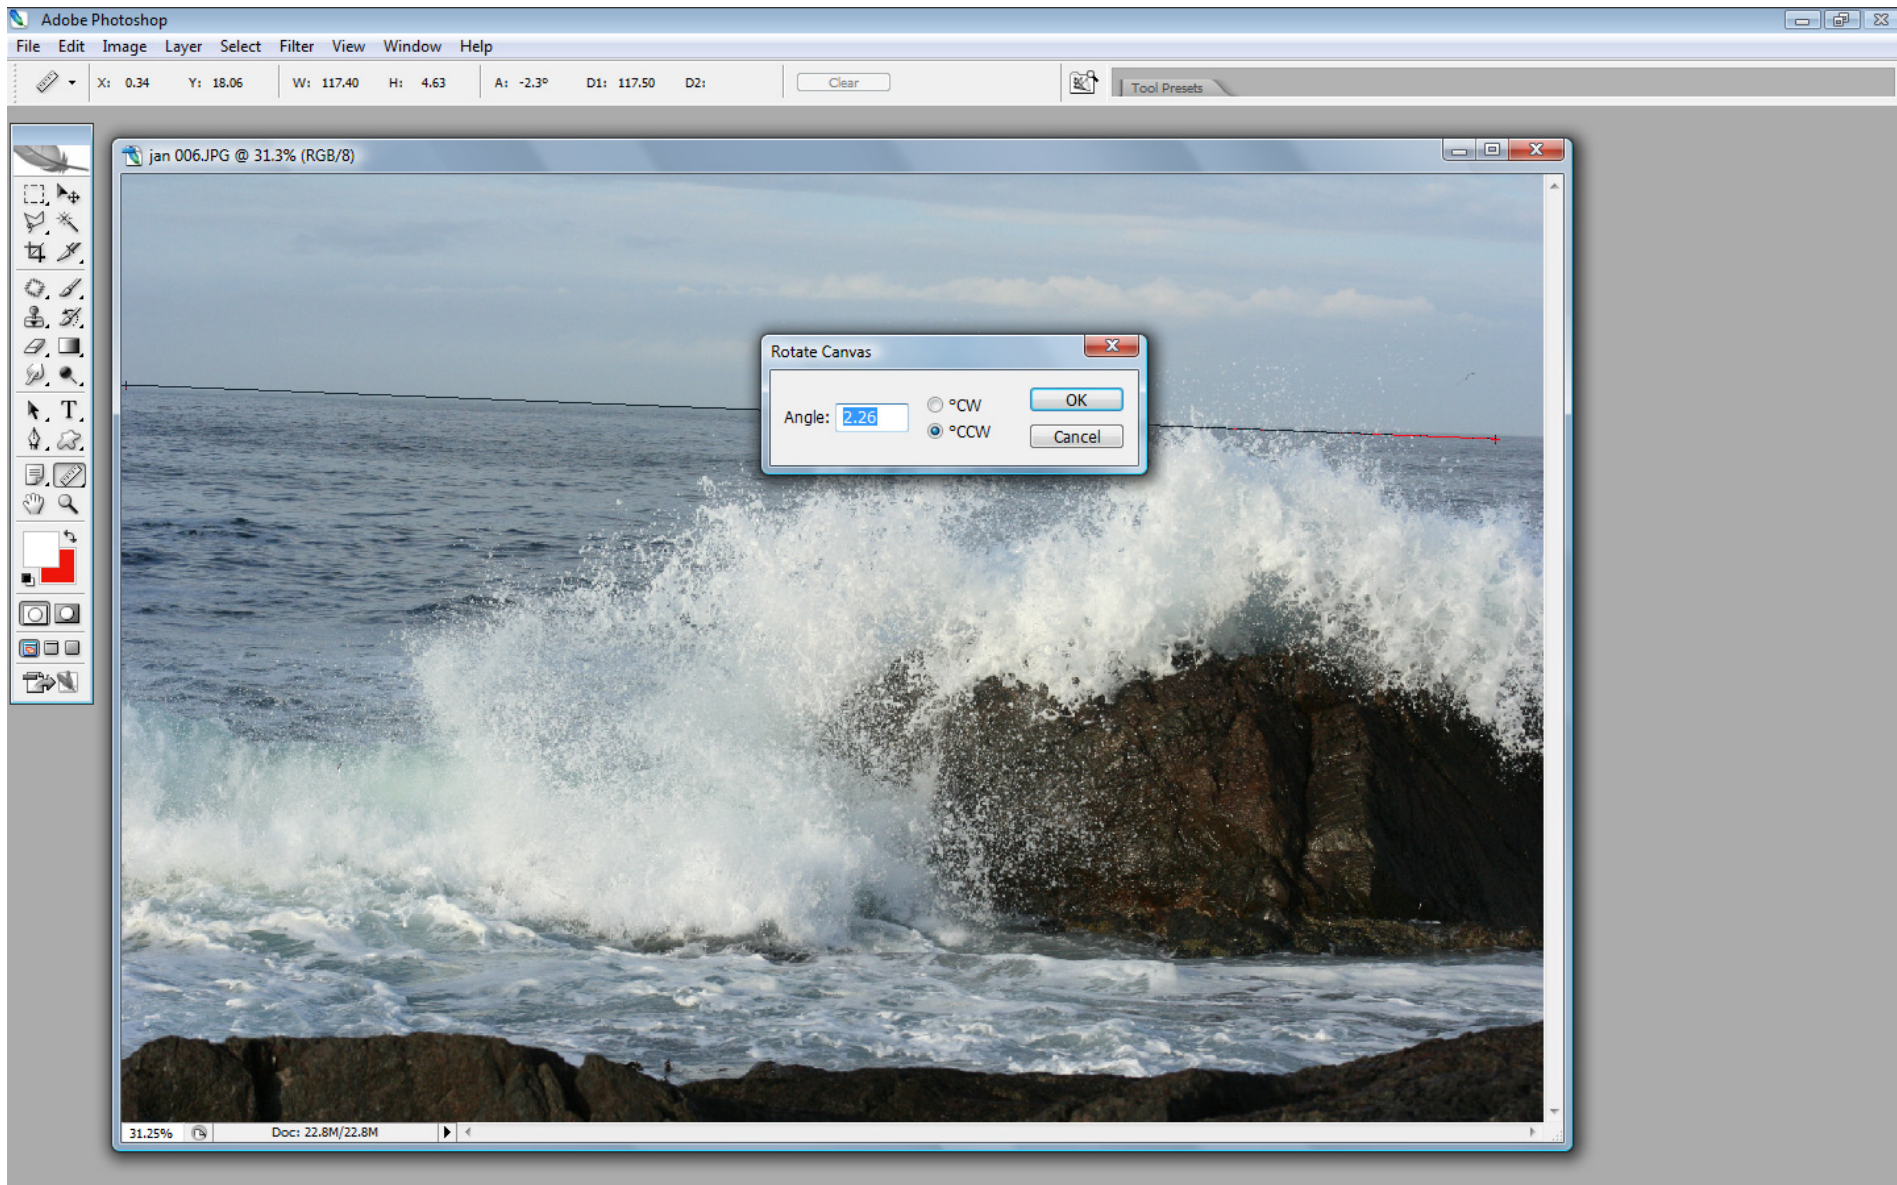

Rechts klik op **Eyedropper** tool kies dan **Measure tool** onder

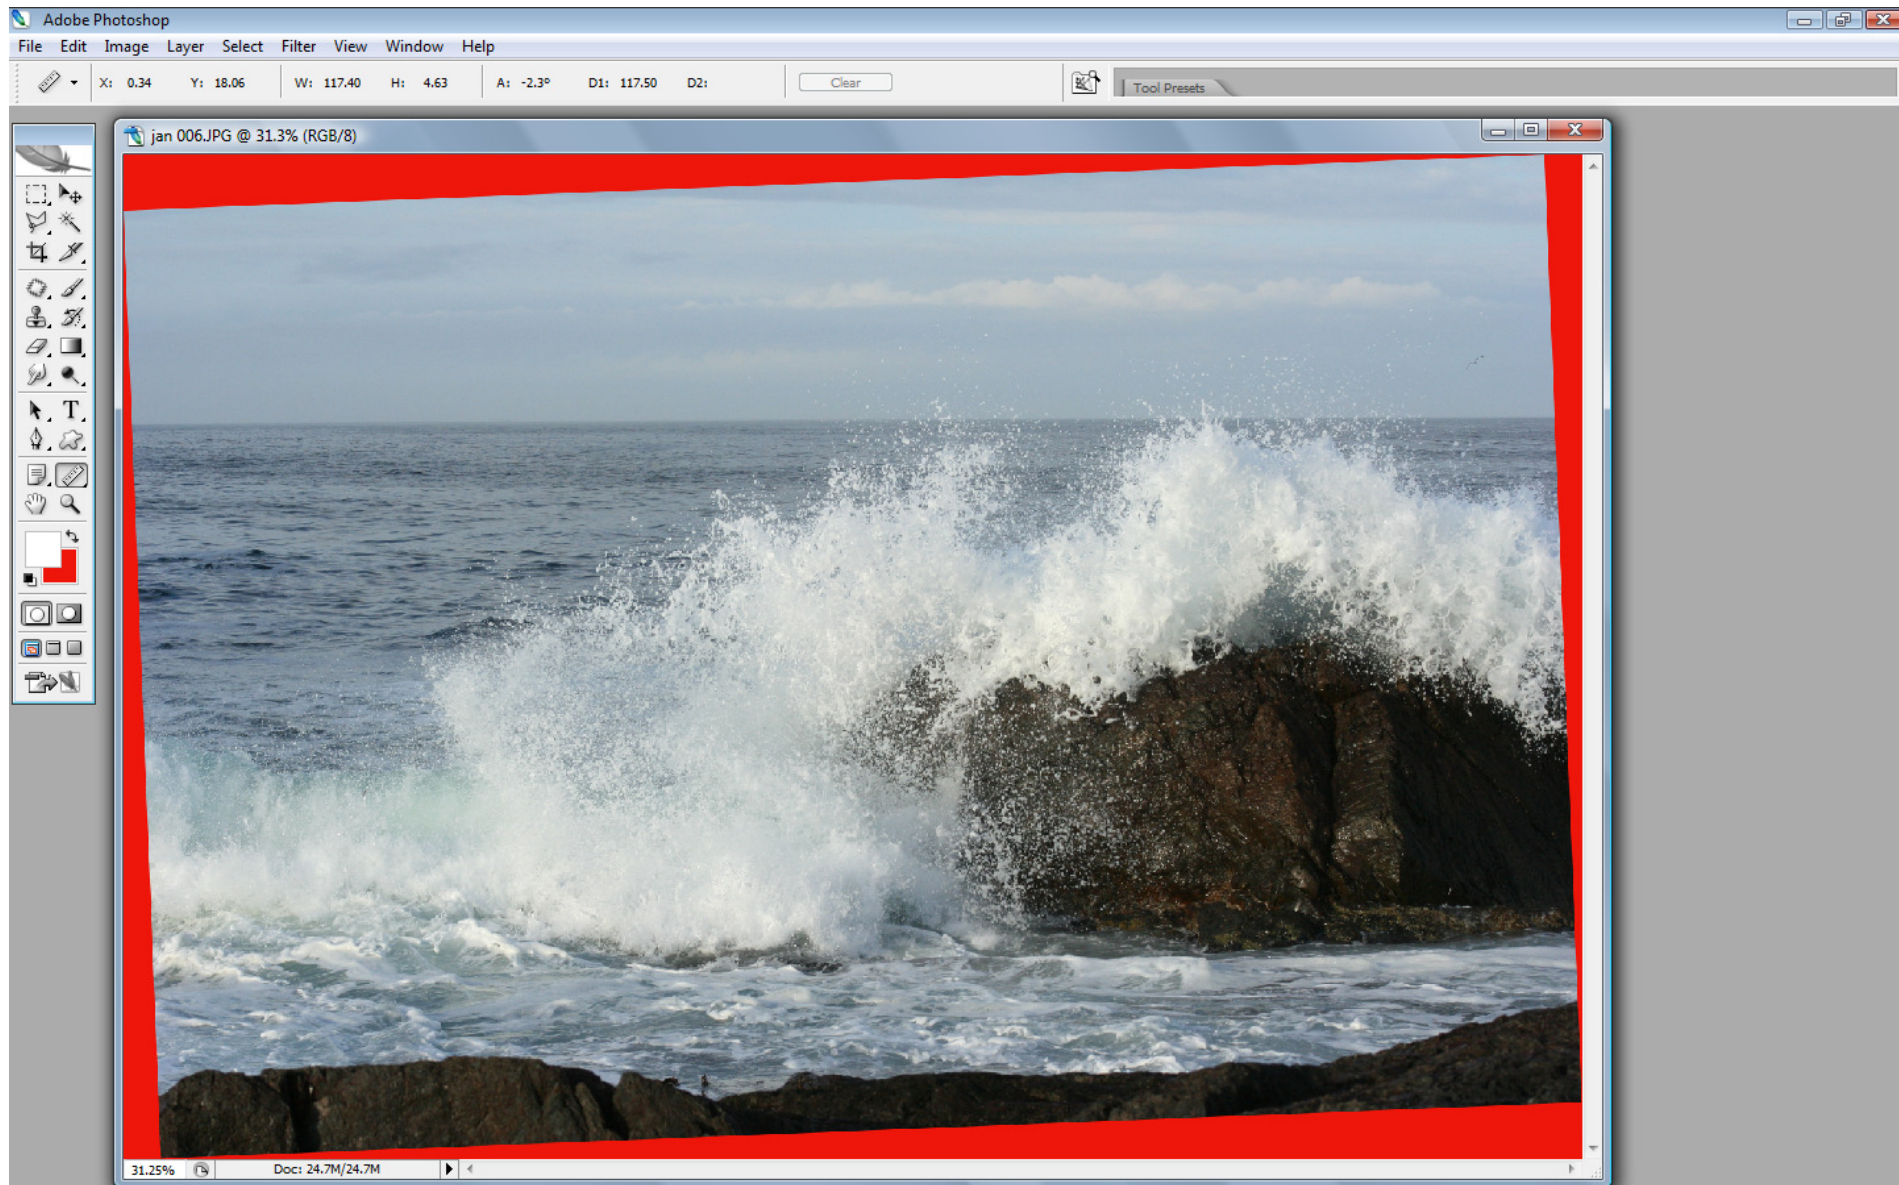

Met jou muis knop ingedruk trek met **Measure tool** lyn op horison op see..

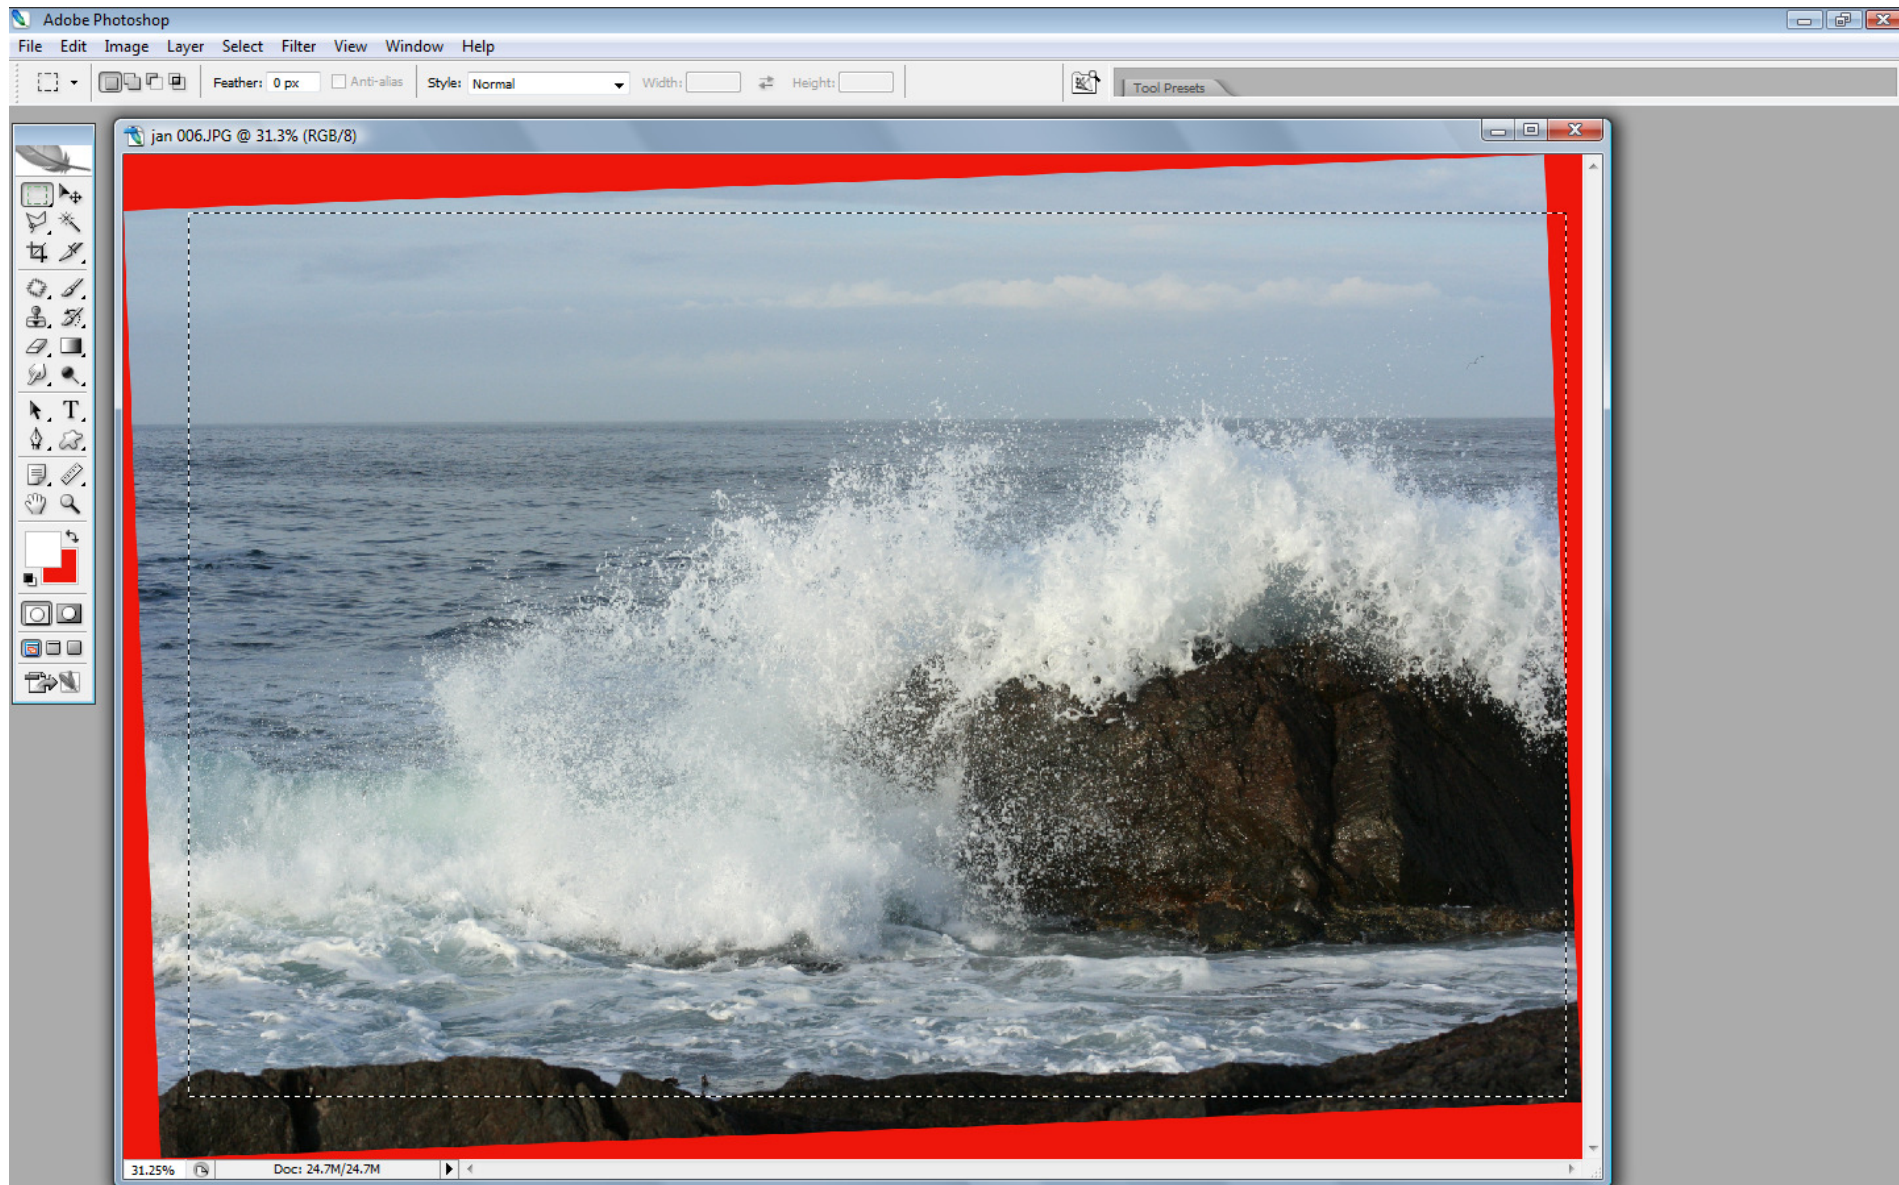

Gaan dan na **Image Rotate** canvas en kies **Arbitrary** en enter..

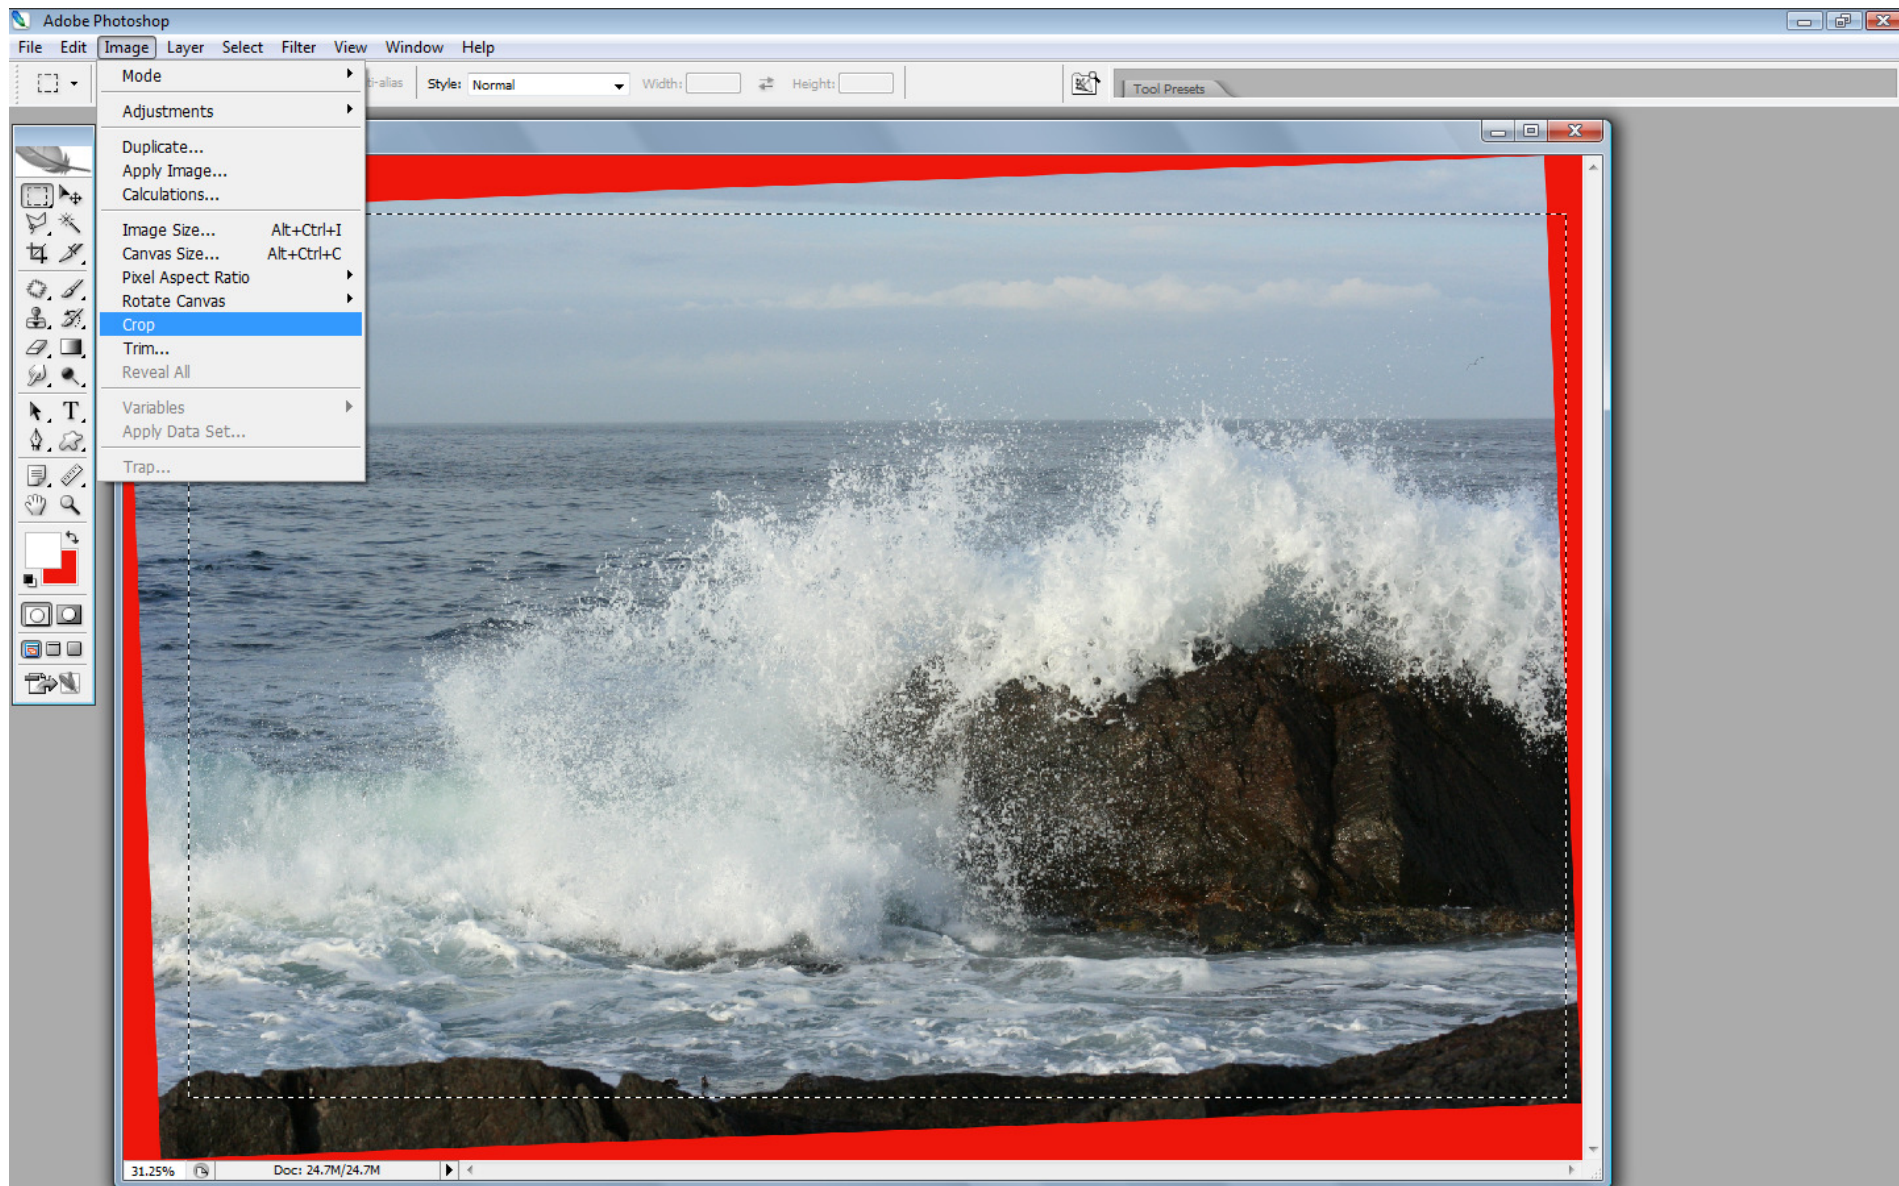

Jy sal dan 'm skermkie kry wat die angle gee Kliek dan net ok

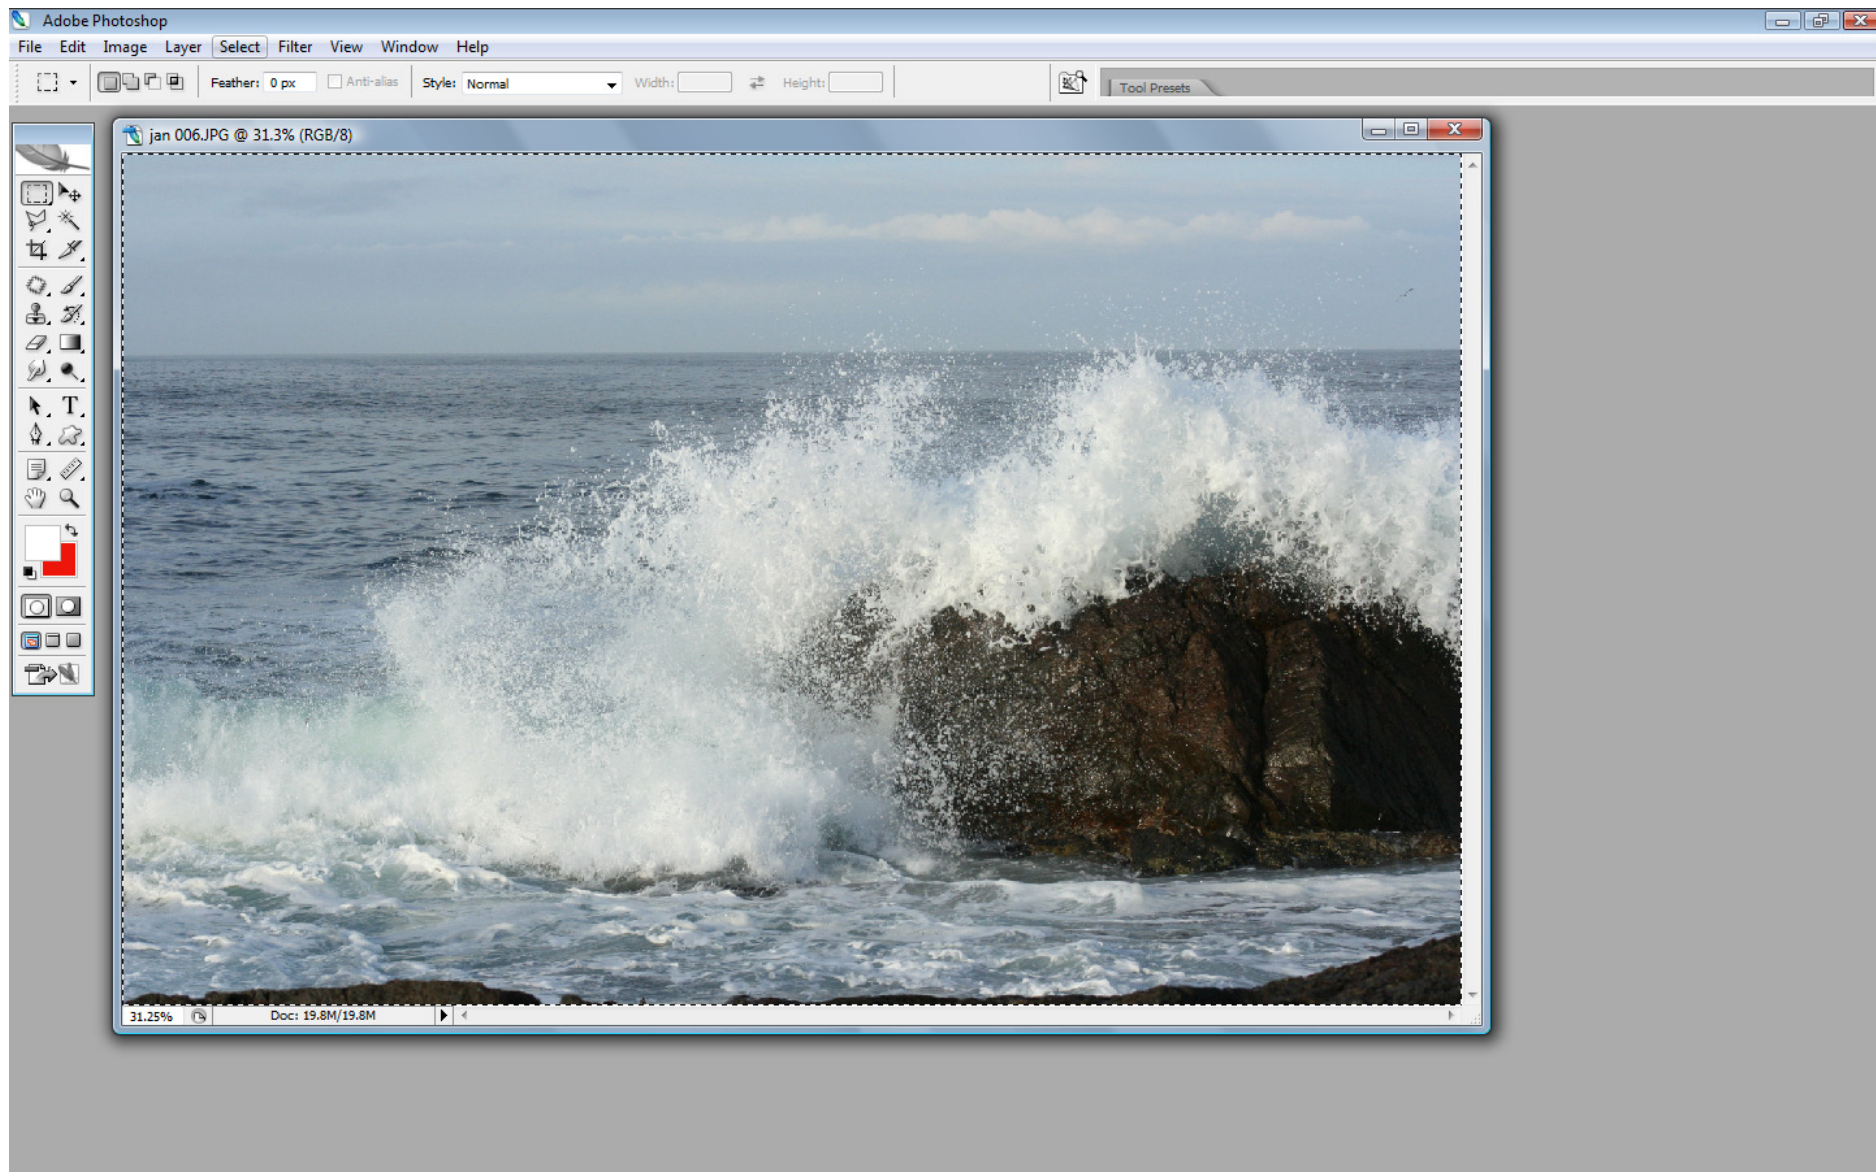

Nou is jou foto reggedraai nog net crop....

Kies **Regtanguler Marque** tool bo en selekteer area versigtig om nie op rooi areas te gaan nie

Nou **Image Crop** en klik muis...

Daar is die eind resultaat horison lyn mooi reguit en waterpas! Safe nou jou foto en jy is klaar Groete Jan en Frieda
